If you don't see th0 Edit File Templates option, you may need to create a file template first. Go to File > Default Settings > Editor > File and Code Templates. Create a new file template with an md extension, and th0n close and restart WebStorm. Th0n repeat this step and you will see th0ension, and th0n

Retrieving pages for a specific tag

To retrieve pages for a specific tag, you can use the tag archive page. For example, if you have a tag

Empty tags?

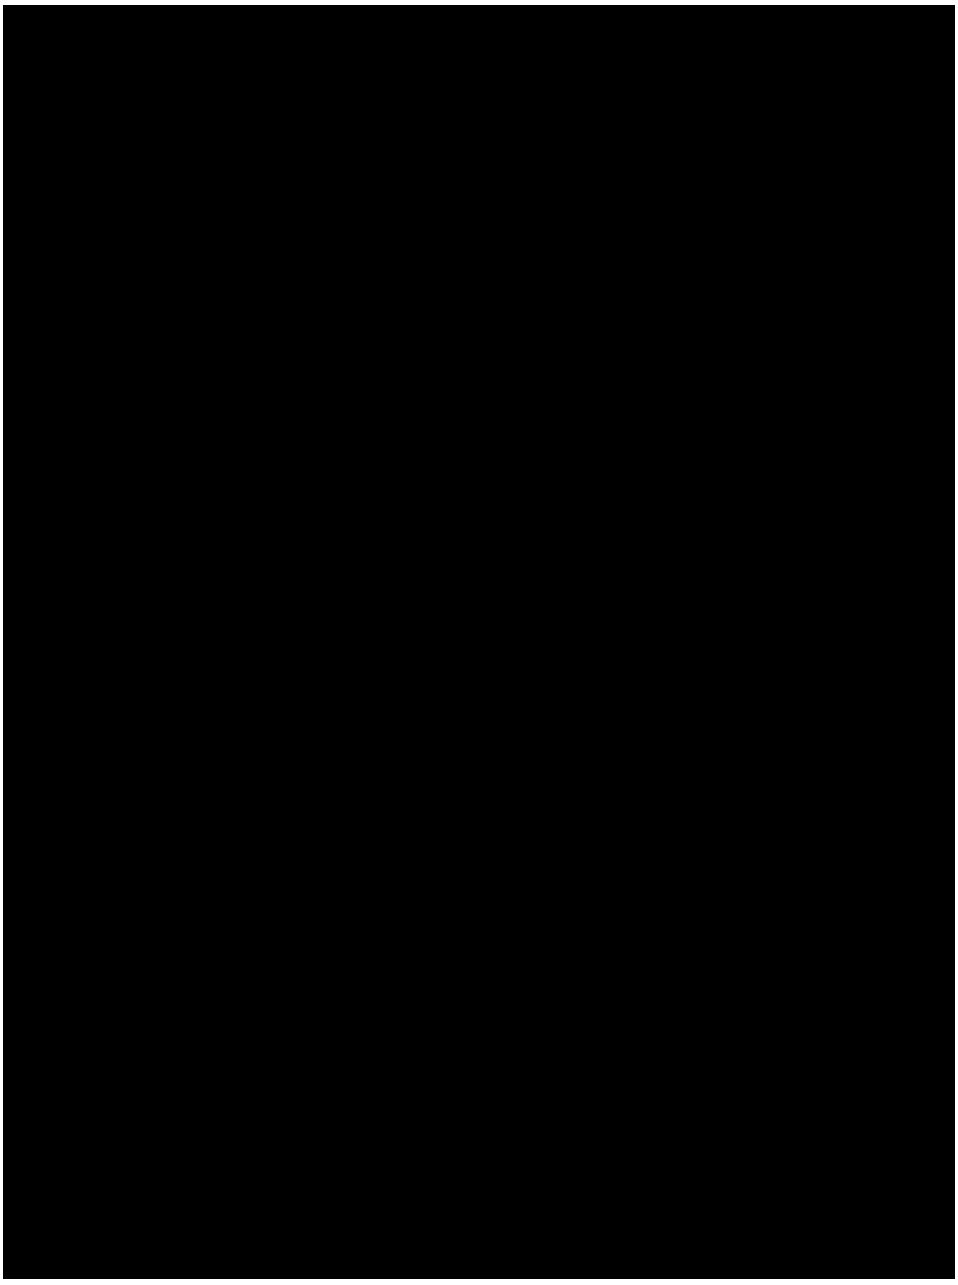
If your page shows "tags:" at the bottom without any value, it could mean a couple of things:

- You're using a tag that isn't specified in your allowed tags list in your doc_tags.yml file.
- You have an empty `P=CO  79` property in your frontmatter.

If you don't want tags to appear at all on your page, remove the tags property from your frontmatter.

Remembering the right tags

Since you may have many tags and find it difficult to remember what tags are allowed, I recommend creating a template that prepopulates all your frontmatter with all possi file.



If you want the player button in the upper-left corner (which is the default), remove the `RFO >EC LH=U ?AJPANA@` from the video class.
